MEDICAL PRODUCTS, INC.
A HAAG-STREIT COMPANY

Dennis E. Imwalle
President

30 June 1992

TO WHOM IT MAY CONCERN

Mike Barnard, P.E., formerly of CUC, was the lead Construction and Design Manager for Reliance Medical Products during the construction phase of its new manufacturing facility. This plant has over 100,000 square feet and was a multi-million construction contract. It is a State of the Art building which has many unique design features.

Mr. Barnard was responsible for developing building specifications, architectural planning, on-site inspection of building progress, and all interface exchanges with Reliance Medical Products.

Mr. Barnard was especially creative in providing solutions to architectural problems such as a pleasing facade and entrance, site layout, and mechanical arrangements.

I heartily recommend Mike Barnard to you. His experience is tops for his profession and highly recommended for both small and large construction projects. You will find him quite energetic and easy to work with.

Sincerely,

Dennis Imwalle
